Call for Papers for LEARNTEC Congress 2025 launched: Help shape digital education now!

Topics related to digital education can be submitted until September 8, 2024

Karlsruhe, 13 august 2024. The call for papers for the LEARNTEC convention - Europe's most important trade fair for digital education in schools, universities and the workplace - is online. In practice-oriented lectures, workshops and discussion panels, the congress from May 6 to 8, 2025 will once again deal with the current trend topics in digital education. Until September 8, interested parties have the opportunity to actively participate in the convention with their research topic, best practice or vision for the future by submitting topics online in German or English or by suggesting speakers.

"In 2025, the LEARNTEC convention will once again show what the future of learning looks like, what the latest findings from research and teaching are and from which best practices from the world of learning and work we can gain important experience. With the Call for Papers, we would like to offer education experts the opportunity to pass on their specialist knowledge to the international convention participants, to exchange ideas with them and thus to work together to shape digital education," say Sünne Eichler, Prof. Dr. Peter A. Henning and Micha Pallesche from the LEARNTEC Congress Committee.

The LEARNTEC 2025 convention will focus on the topics of digital learning in the professional environment. Submissions are welcome on topics such as learning content and its production, hardware and equipment, learning software and intelligent learning systems as well as learning with artificial intelligence. However, education management and education culture are also sought-after topics, as are new work and modern workplace learning in the fields of HR and coaching. The LEARNTEC Convention Committee and Advisory Board will then compile essential parts of the convention program from all submissions and according to strict criteria.

Topics on digital education in schools and universities as well as augmented and virtual reality can also be submitted. These will be integrated into the trade fair's specialist forums, such as the AR/VR Area, the university@LEARNTEC specialist program or the school@LEARNTEC forum. Among other things, best

practice examples from digital teaching at universities, the future of education systems or teaching with digital media are being sought.

All information on the topics and criteria of the Call for Papers as well as the submission documents can be found on the [LEARNTEC website.](#)

About LEARNTEC

LEARNTEC is Europe's largest event for digital education. Decision-makers from industry, the consulting sector, retail and sales as well as schools and universities come to Karlsruhe every year to find out about and exchange information on the possibilities of digital learning. The LEARNTEC Convention provides practical knowledge over three days. Open-space sessions and open discussion rounds promote the exchange between speakers and participants.
